

CHARLES HENRY MEREDITH WILLIAMS, D.D.S., B.Sc.D.

Came from London, Ontario.

Entered the Faculty of Dentistry, University of Toronto, where he was active in sports: Basketball and Rugby, President of the Fourth Year, and a member of the Dentantics cast. He graduated in 1927, and in 1928, received his Bachelor of Science Degree in Dentistry.

In 1939, he conducted a dental survey and investigation amongst the Eskimos of Canada's Eastern Arctic, the results of which were published in the Journal of Periodontology in 1943.

His manuscript, in joint authorship with Dr. David G. Watt of New Zealand - "The effects of the physical consistency of food on the growth and development of the mandible and maxilla of the rat" was awarded First Prize by the Research Committee of the American Association of Orthodontists for 1951. It was presented to the Association in April, 1951.

He has given a great number of clinics and lectures on Periodontology in Toronto and throughout Ontario. In addition, he has presented papers in Boston, New York, Cleveland, Pittsburgh, Philadelphia, Chicago, and many other American cities.

He was Chairman of the Journal Committee of the Canadian Dental Association in 1943, and is a member of the American Academy of Periodontology.

Was Chairman of the Advisory Committee of the Canadian Dental Association.

He joined the staff of the Faculty of Dentistry, University of Toronto in 1928 as Research Assistant, and is now (1955) Professor of Periodontology in the same Faculty.

In 1953, he was Chairman of the campaign to obtain contributions from members of the dental profession to finance an expanded research program.
