* Pubmed	
* Cochrane Library	
* OVID	
* Web of Knowledge	

Library Website - new academic year, new look

Today's hours: Thursday, 8:30am - 8:30pm

We are excited to announce that on August 31, 2012 we launched our new website powered by Drupal. Don't fret, you don't have to change your bookmark, the home page address is still the same <http://www.library.utoronto.ca/dentistry>.

We would like to thank Marc Lalonde, Web Coordinator and Librarian, University of Toronto Libraries. Marc and his team worked really hard the past year to build, develop, and tweak the website, as well as provided training sessions for web administrators.

Website survey feedback implemented

The Library conducted a survey in April and May of this year. Thank you very much for all the tips and suggestions! As the result, we have implemented the following changes:

- * **Hours** on the home page. 'Today's hours' are now displayed on the top right corner of the home page for your convenience.
- * A **course reserves** page. Many students asked for a page listing the required textbooks, it is now available at <http://dentistry.library.utoronto.ca/dentistry-course-reserves> and a shortcut to this page is on the home page.
- * **Buttons** on the right hand side of the page are there to help you find the most popular pages, including the course reserves, interlibrary loan, Blackboard, renew books, research guides and our contact information.
- * **Workshops (in person or online)** from other libraries and database vendors are now displayed in the bottom of the page for your interest.

Editors: Helen He
Maria Buda

More new features

Workshops	
Wed, Sep 26	RefWorks: Manage your research online
Wed, Sep 26	Mini Essay Workshops: Avoiding Plagiarism
Wed, Sep 26	What Every New Undergraduate Science Student Needs to Know
Wed, Sep 26	Time Management

- * [Research guides](#): we expanded our collection of online research guides to benefit current students, staff, and the dental community.
- * **Major resources** (for dentistry) is still on our homepage with the addition of direct links to [Embase](#) (tracking drug adverse events, comparing drug therapies for disease and Evidence Based Medicine research) and [Primal Pictures](#) (online anatomy reference from Ovid).
- * **Meebo was replaced by Ask a Librarian**: [Ask a Librarian](#), is a Scholar's Portal initiative that aims to provide chat services. Note that it is not staffed with the dentistry library employees, but knowledgeable librarians and library students from all over Ontario universities and colleges. For specific dentistry library related questions, you can still [contact Dentistry Library staff](#) in person, by email or by phone.
- * The **All Search** tab. This tab searches, not just books and journals, but also journal articles from various databases, all in one search. Give it a try for your favorite topic.
- * If you previously have seen something on a library page, but can't quite recall where, use the '**Library web**' tab to search our pages.
- * **Featured items**: in this section we plan to highlight the special resources available at our library. Currently it is displaying our instructional YouTube videos.

Update from Different Databases

PubMed

- * The limits are now called '[filters](#)' and are listed on the left hand side of the page. Here is the [tutorial](#) for using it.
- * [Results by year](#): on the right hand side of the search results, a timeline tool displays the number of publication related to your search topic over the years.
- * A new section called [PMC images](#) displays graphs and figures from your search results. These can be useful when you are preparing a presentation. Please note that it will only display images from PubMed Central sources.
- * **Browser Alert**: NCBI web applications will no longer be supported in IE7 or FireFox3 starting January 1, 2013. 

Cochrane Library

Do you dread using the MeSH search in the **Cochrane Library**? Great news, a [new look and easier to use interface](#) is now available. The improvements are:

- * Auto-suggest features within both basic and MeSH search functions
- * Updated display of search results and filtering options
- * Ability to view search terms and results on the same page
- * Ability to insert lines and add one search to one another
- * Improved MeSH look-up feature
- * Hover-over Tool Tips giving a brief explanation of the functions

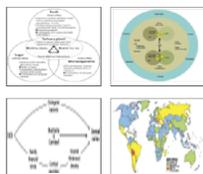

Ovid

Now when conducting the basic search in several Ovid databases, you will note a new section on the right hand side called '**Open Access Results**'. This initiative by OVID aims to highlight open access journals and encourage their use. Please click [here](#) to learn more about OvidOpenAccess.

Web of Knowledge

[Roaming access](#) - Once the users create accounts for Web of Knowledge from an IP authenticated computer or device, by using their user name and password, they can directly access the Web of Knowledge (including Web of Science, EndNote Web etc.) from anywhere at anytime without going through the library proxy server. However, the users are required to verify their authorization every six month from an IP authenticated computer or device.

PMC Images search for dental caries
